NEWROCKET

Security Posture Control Quick Start

Breakdown silos and catch holes in your security posture before they become breaches

Now you can get a complete understanding of your attack surface & security posture under a single pane of glass.

Increase transparency, visibility, and efficiency in managing your attack surface and security posture

Security Posture Control provides improved visibility into your attack surface, highlighting vulnerabilities, internet-facing assets, and risky combinations, enabling teams to prioritize tasks more effectively.

- ✓ Know your attack surface
- ✓ Know where your security controls are weakest
- ✓ Identify your riskiest combinations of exposures
- ✓ Prioritize your teams daily work with full context

Get a complete view of your security risks in a single pane of glass

Gain comprehensive insight into your asset inventory, encompassing unmanaged and unauthorized assets, to enhance compliance with security benchmark standards like CIS and prioritize critical vulnerabilities effectively.

- ✓ A view of your asset inventory, even unmanaged and unauthorized assets
- ✓ Both on-premises and cloud assets are included.
- ✓ Use industry benchmarks to boost your compliance

Metrics for success

Simplify and centralize reporting and create reports seamlessly without the use of excel, laborious manual data collection, or customer tools. Get a clear view of both the success of this program and the return of investment for the product and project.

- ✓ Centralized reporting
- ✓ Get value within weeks
- ✓ Improved efficiency through automated tasks
- ✓ Get clear insight into your ROI

Leverage a proven methodology

By taking a crawl – walk – run approach to implementing Security Posture Control with an Elite Partner, you'll see immediate benefits including a simplified user experience, consistent risk management and increased visibility and reporting.

- ✓ Avoid common pitfalls based on experience
- ✓ Industry standard workflows
- ✓ Unique deployment approach focused on simplicity
- ✓ Unmatched services support and advisory
